

KRISTINE FAITH PUTON

Full-Stack Web Developer

Pasig, Metro Manila, Philippines | kfaith.puton@gmail.com | 0923 983 2710 (Viber/WhatsApp)
linkedin.com/in/faithputon | github.com/kfaith98 | faith-puton.netlify.app

PROFESSIONAL SUMMARY

Full-Stack Web Developer with six years in event production and marketing, now building user-centric, responsive web applications with JavaScript, React, Node.js, and MongoDB. Recently completed a full-stack bootcamp, shipping six deployed projects including a MERN booking platform with JWT authentication and an AI-powered supplier matching tool.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React, Node.js, Express.js, Tailwind CSS, Mongoose

Databases: MongoDB (NoSQL), schema design, data modeling

Tools & Platforms: Git, GitHub, GitLab, VS Code, Postman, Netlify, Render, Google Gemini API

PROJECTS

On the Books — Full-Stack MERN Application

React, Node.js, Express, MongoDB, JWT, bcrypt • Live: onthebooks-fullstack.onrender.com (free hosting, login: demo_producer1/demo12345)

• Code: github.com/kfaith98/web-dev-portfolio/tree/p5-backend-node-app

- Built a booking platform for event organizers to track supplier arrangements across multiple events, pairing a component-driven React frontend with a custom REST API.
- Designed a normalized MongoDB schema using a junction collection to model many-to-many event-supplier relationships, keeping booking records queryable from either direction.
- Implemented authentication with bcrypt hashing and JWT sessions, with protected routes and role-based authorization enforced server-side rather than on the client.

EventMatch AI — AI-Powered Web Application

Vanilla JavaScript, Google Gemini API, Netlify Serverless Functions • Live: eventmatch-ai.netlify.app • Code: github.com/kfaith98/web-dev-portfolio/tree/p3-js-api-app

- Built a web app matching Philippine event organizers with suppliers from a plain-language event description, returning specific reasoning for each match.
- Routed all AI requests through Netlify serverless functions to keep the API key server-side, preventing credential exposure in client-side code.

Logix WMS — Warehouse Management System (Team Project)

MERN Stack, Git Feature-Branch Workflow • Live: logix-wms-frontend.onrender.com (free hosting, login: admin@logix.demo/demo123)

- Front-end developer and QA on a 5-person team building batch-level inventory, FEFO stock movement, and role-based access. Refactored 11 pages onto a shared navigation component, removing ~300 lines of duplicated markup and restoring four broken features, and fixed two React lifecycle crashes reachable only through client-side navigation.
- Sole merge owner of the team's dev branch — reviewed and integrated every teammate's feature branch, resolved conflicts across overlapping implementations, QA'd each card against its acceptance criteria, and ran both production deployments.

Instant Inquiry Reply — Embeddable Widget

Vanilla JavaScript, EmailJS • Published on [Gumroad](https://gumroad.com) and offered as an install service on [Upwork](https://upwork.com) • Demo: evangeline-and-co.netlify.app

- Designed and shipped a config-driven widget that sends a branded automatic reply the moment a couple submits a photographer's inquiry form, plus a detail summary to the photographer. Packaged it as a self-serve product with install documentation and a done-for-you service tier.

PROFESSIONAL EXPERIENCE

Events Producer — Digicon Events Corporation, Taguig, Philippines

July 2023 – Present

- Led end-to-end planning and execution of corporate and brand events, and coordinated cross-functional teams and suppliers, translating client requirements into detailed specs and timelines that kept delivery on schedule.
- Tracked supplier records and booking status manually across spreadsheets — the pain point that directly informed the data model behind On the Books.

Account Executive — MME Connections, Makati, Philippines

September 2020 – March 2023

- Developed and executed marketing strategies while managing client accounts, timelines, and deliverables across brand activations, events, AVP production, and trial-generation campaigns.

EDUCATION

Uplift Code Camp | Full-Stack Web Development Bootcamp | August 2026

University of the Philippines Diliman | Bachelor of Arts in Anthropology | 2019
